

TEJAS CM

ASPIRING SOFTWARE DEVELOPER

PROFESSIONAL SUMMARY

Information Science graduate (VTU, 2026) with hands-on experience in Python, Machine Learning, web application development, and Generative AI through academic projects and a Python & Generative AI internship. Developed an AI powered stock market simulator, an AI healthcare chatbot, and an emotion detection application. Seeking an entry-level IT opportunity to apply technical skills, learn new technologies, and contribute to software development projects.

PROJECTS

AI-Powered Stock Market Simulator | Python, Streamlit

- Developed a stock analysis web application using Python and Streamlit to explore stock market data.
- Worked with historical stock data and created interactive candlestick charts for analysis.
- Implemented configurable stock selection and analysis parameters.
- Explored stock price prediction and news-driven analysis concepts using Machine Learning.

Care Connect — AI Healthcare Chatbot | Python, API

- Developed an AI healthcare chatbot to provide structured health information through conversational interactions.
- Implemented symptom-based queries and conversational responses using NLP concepts.
- Worked on features including voice input, multilingual support, and nearby hospital finding.
- Designed the application to make basic health information more accessible to non-expert users.

Emotion Detector | Python

- Developed a Python application to classify emotional tone from input data.
- Applied Machine Learning concepts to process input and identify emotional categories

CERTIFICATIONS & ACHIEVEMENTS

- Certification in Machine Learning - Preplnsta
- Certification in Full stack Web Development - Preplnsta
- 2nd Prize, Hackathon (2024)

ADDITIONAL INFORMATION

- Open to entry-level IT and software development opportunities.
- Willing to learn new technologies and work in a team environment.
